“Over the past 6 years the mission of the School Supplies Program is to provide **inclusive education** amongst families across South River. Many people don’t realize how having the proper supplies for school not only promotes **student success**, but **overall happiness** whilst in the classroom. A KINF study showed that amongst the teachers surveyed **79%** said that student preparedness creates a sense of equality, **74%** said that student preparedness allows them to focus their time more so on other areas of need beside school supplies, and **71%** of them said that student preparedness increases the scope of projects offered to students, therefore expanding their educational horizon. My goal as one of the runners of this program is to give back to those who fill the community that once gave so much to me, and ultimately contributed to my success in college.”

-Selena Gaspar
6 year volunteer for the SSD
