During the hydrant flushing there may be a noticeable decrease in pressure, as well as discoloration in the water that may last for long periods of time. This is not physically harmful and will not affect the safety of the water for drinking and sanitation purposes. If this occurs, please run your **COLD** water for several minutes to clear your lines. You should also flush your toilets once or twice. The water should run clear within a few minutes. Below is the schedule for flushing during each week. (Even though your street isn't on this list, you can still experience a decrease in pressure and discoloration)

For more information, please contact the South River Water Department at 732-257-9051
